Designer and founder in London. I started making things for money at thirteen and never stopped. Today I run Ignura and Bevel, both at six figure ARR, do design at MenuFit (two million users, seven figure ARR) and Okara, and lead product at Nooli. I like owning a product end to end: the brand, the interface and the code that ships it.

7 figure	**2M**	**6 figure**	**6 figure**
MenuFit ARR	MenuFit users	Ignura ARR	Bevel ARR

Experience

Ignura — Founder • Since 2026

Launch studio for apps • London

- Started the studio and run it day to day with a team of four: design, launch films, UGC and launch day, so an app team gets one crew instead of five freelancers.
- Grew it to six figure ARR on fixed scope packages, from a single App Store screenshot set up to a full four week launch.
- Backed our UGC with a guarantee: 10k views in two weeks or the money back.
- Shipped work for Okara, Splitting Point, Yummers and hypjam, and made Ignura's own brand, launch film and site.

MenuFit — Designer • Since 2026

The app for eating out healthy • iOS and Android

- Design the product for an app with two million users and seven figure ARR.

Bevel — Founder • Since 2026

3D art team for hire • Blender, ZBrush, Substance

- Built a 3D art team that studios hire by the job, at published rates.
- Reached six figure ARR delivering game ready models, textures and commissions.

Nooli — Head of Product • Since 2026

Adaptive lessons for ages three to five • iOS

- First hire. Own the product and its design system, built in SwiftUI.
- Lessons for three to five year olds that adapt to the child.

Okara — Designer • Since 2026

AI CMO that drafts and ships marketing work

- Design the product for an AI CMO that drafts and ships marketing work.
- Its launch film reached 14M views on X in a day.

Side project

Wayari — Founder • Since 2026

Side project • Mac app

- A desktop app for running several coding agents at once: ship PRs while you sleep, merge them with your eyes open.
- Designed and built end to end in Electron, TypeScript, React and Next.js.

Earlier work

Bidframe — Founder • 2026

Reads a tender and flags what would disqualify your bid, each linked to its clause.

Weld — Founder & PM • 2026

A marketplace fixing how Roblox studios hire developers. Waitlist is live.

Other work

jawadj.design — brand identity, ui/ux and full site builds

acquiblox — cmo, marketing and community growth

world ent — 3d artist on live roblox titles

basket ent — acquisitions, then post acquisition liveops

cosmos models — 3d commissions in zbrush, blender and substance

sof agency — pr, partnerships and crowdfunding for game studios

vizzbees — saas site build

kleoklaw — mobile product site build

splitting point — landing page build
