Design engineer and founder, fifteen, based in London. I'm building Ignaru, a design canvas for coding agents, and I design and build sites for startups through Ignura, my studio. I design consumer apps used by millions and write the production code behind what I design. Fast, hands on, and happiest owning a product end to end.

1.5M	7 fig	2	14M	13
people use the app I design	ARR at MenuFit	companies I run at 6 figure ARR	views on Okara's launch, day one	age I started selling my work

Experience

Ignaru Founder — 2026 to now

A design canvas for your coding agent • ignaru.com

- Designed and built a full product: a canvas that opens your repo, where you circle what's wrong and your own coding agent fixes it. Next.js, Supabase, WorkOS auth, usage based credits, and a **Tauri desktop app for Mac**.

Ignura Founder — 2026 to now

Design studio: websites for startups, built from scratch • ignura.com

- Founded and run a design studio that designs and builds startup websites from scratch, with launch pages live in about a week; grew it to **six figure ARR**.
- Delivered launch, design and growth work for **Higgsfield, Okara, Splitting Point, Yummers and hypjam**.
- Designed and built ignura.com end to end (Astro, Vercel), including an AI assistant and client growth boards; took mobile Lighthouse from **35 to 90**.

MenuFit Product Designer — 2026

The app for eating out healthy • iOS and Android • menufit.com

- Designed the core product for an app with **1.5 million users** and **seven figure ARR**: a healthy menu for every restaurant, with macros and a fit score on each dish.
- Owned screens across iOS and Android, light and dark, and the components they share.

Okara Product Development Intern — 2026

AI CMO serving 150,000+ businesses • okara.ai

- Won the internship with an unsolicited product teardown: a week on the free tier, then a deployed site with **three redesigns built as live React mockups**.

Bevel Founder — 2026 to now

3D art team for hire • Blender, ZBrush, Substance • bevel.team

- Built a 3D art studio that game studios hire by the job at **published rates**; reached **six figure ARR**.
- Run the full pipeline from sculpt to textured, game ready asset, plus the brand, site and client relationships.

Nooli Head of Product — 2026

Adaptive lessons for ages three to five • iOS

- **First hire.** Owned product and the design system (SwiftUI) for lessons that adapt to each child; left to start Ignura.

Selected builds

- **Clicky Graph**: an interactive product demo for heyclicky.com, on a hand rolled renderer of 3,000 elements
- **claude-code-spend**: open source tool that prices every token class in local Claude Code transcripts
- **Client sites**: Splitting Point, Vizzbees, KleoKlaw: design and build, brief to launch
- **Bidframe**: one of four builders at a hackathon. It reads a tender pack and flags what would disqualify the bid
- **Weld**: an earlier product I founded: a hiring marketplace for Roblox studios

Skills

Design
Product design, UI/UX, interaction, design systems, brand identity, art direction, prototyping

Build
TypeScript, React, Next.js, Astro, Tailwind, Supabase, Vercel, SwiftUI, Tauri, Electron

Growth
Positioning, go to market, launch, landing pages, App Store assets, analytics (PostHog)

AI
Agentic coding (Claude Code, Codex, Cursor), LLM products, AI Gateway, OpenRouter

3D
Blender, ZBrush, Substance, game ready assets

Tools
Figma, Framer, Paper, Playwright, GitHub

Education

Queen Elizabeth's School, Barnet
GCSEs 2027 • predicted 9,9,9,9,9,9,9,9,8,8 • Triple Science, Maths, English (Higher), Economics, German, History, Production Design

Duke of Edinburgh's Award
Bronze

Earlier

Acquiblox
CMO: marketing and community growth

Basket Ent
acquisitions, then post acquisition liveops

World Ent
3D artist on live Roblox titles

SOF Agency
PR, partnerships and crowdfunding for game studios

Cosmos Models
3D commissions
